

As a K-Love listener, I am writing to comment on the proposed regulations. There are several things I don't support regarding proceeding 04-233:

1. The requirement of Community advisory boards is not necessary. A station has the right to broadcast whatever it chooses within the law and the listeners have the right to choose what to listen as well.
2. Requiring of additional staffing will harm most stations. I do not want to see K-love or other smaller stations been forced to leave the air because of the financial burden of the additional staffing required.
3. This proceeding will harm the radio and the listening public will not be able to listen the station they love. Please do not to pass it.
